Though college is a great opportunity to learn life skills, it's also a time when you're surrounded by several resources and individuals ready to help you advance in your field. As a college student, taking career advice can help you feel more equipped upon graduation. It can also help student to become more confident in their skills and helpful to career decisions.

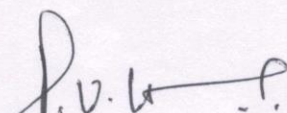

Sri Ch.Subrahmanyam advised students to select goal and start early and stay focussed, assess their skills and knowledge, Strive for excellence and stay motivated always, build their net work of good peer group, actively seek and create opportunities, to achieve all the goals find a balance with their personal life. Generally Employers want to hire candidates with a wide range of skills. So use your college years to expand your skills and overall knowledge. Consider elective courses relevant to your career aspirations. To ensure you get the most out of your career, start looking for opportunities before you graduate. Find jobs relevant to your major interest. Even if you do mistakes, they can provide you very valuable experience and knowledge in facing situations later on. Know that these experiences can shape you to become a stronger-working professional in your field. Though it's important to focus on your studies in college, it's important to leave time for the little things in your life like family, friends etc., too. This will help and take you to the habit of continuing a healthy work-life balance throughout your future career.

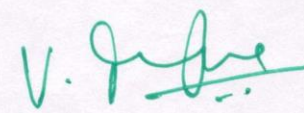

Participation in career guidance activities in colleges provides students with necessary awareness, knowledge and skills required in the world of work. It is a strategy for providing occupational orientation to students to become aware of what is contained and required in the career of one's choice that match interest and abilities. Occupational orientation is viewed as an important aspect of the career development process; adolescents must identify their interests and abilities.

The inclusion of students' responses is a result of recognition that adolescents may be the best source for identifying their own needs and that including the student's perception could increase the accuracy of the assessment results. Career Information Success is more likely when individuals make decisions about what they are to learn in a well-informed manner; link what they learned to their interests, capacities, aspirations, and are then informed about the existing opportunities to which the learning can guide. Good quality career information is a crucial factor for first-rate career decision making. Career information is necessary, but not sufficient for good-quality career decision making unless students have access to the information they need, understand the information, relate it to their personal needs and situation, and then convert it into personal action, with help of professional counselors and participation in career guidance related activities provided in colleges.

The purpose of education is to explore and develop potentials of individuals and while doing so, the career choice will also be made optional in the student's life. Students need career guidance to explore and plan for future career endeavors based on their individual interests, skills and values. Participation in career guidance enhances linkage of academic and career experiences and thus, improves career preparation and management. Career Guidance is a counseling programme designed to help students choose the right career path based on their educational and professional choices. It is a qualitative and quantitative assessment of the knowledge, skills, information, and experience to identify career options available.

On 2nd March 2022 in KRK Government degree college ,Addanki ,the career guidance cell in coordination with department of Public Administration and Dept of Political Sciences arranged a career guidance programme at 12.00 noon by the Premier Academy ,Guntur which is famous for its potential in giving coaching for both Central government and state government jobs. The programme was initiated by the stage invitation of Sri.Ramaseshu,I/C of Dept. of Public Administration.Our principal. Dr.V.Mohan Rao, in his keynote speech spoke on importance of career guidance in colleges.Dr.P.V.Hemalatha,lecturer in Chemistry and Convener, Career guidance cell narrated the values required to acquire a job. Later the director of Premier Academy, Sri.Ch.Subrahmanyam gave an elaborative, informative and very interesting speech to the students, which created job inspiration in their minds a lot. The programme was closed by the presentation of vote of thanks by sri.K.Prabhudas, I/C.Dept of Political Sciences.
